

Daniel Tzul

Full-Stack Developer

dtzul8@gmail.com | (682) 313-3756 | github.com/Dtzul04 | linkedin.com/in/dtzul04

SUMMARY

Full-stack developer on a mission to build applications that engage, perform, and endure. Building across the complete stack in JavaScript and TypeScript, with a dedication to understanding every layer deeply enough to elevate it. Committed to growing as an engineer and raising the standard of every product contributed to.

PROFESSIONAL EXPERIENCE

Website Development & Digital Catalog Intern | Amerimax and Mobility April 2026 – Present

- Designed and built a structured digital product catalog for a mobility equipment company, organizing inventory to improve customer navigation and support the sales team's workflow.
- Audited the existing website for UX inconsistencies and layout errors, delivering documented recommendations to strengthen the company's client-facing digital presence.

To-Go Server / Cashier | Babe's Chicken Dinner House June 2024 – March 2026

- Managed accurate order fulfillment across simultaneous transactions during peak service in a fast-paced, high-volume environment.
- Verified every takeout order against customer specifications before handoff, consistently reducing errors and maintaining quality control standards.

PROJECTS

Magnifit | Solo Developer June 2026

- Built and deployed a full-stack workout tracker using React, TypeScript, Node.js, Express, and PostgreSQL, featuring full CRUD functionality to log, filter, edit, and delete workouts.
- Designed a REST API with five endpoints connected to a Supabase PostgreSQL database and deployed the backend to Render and frontend to Vercel with environment-based configuration.

Dallas Finder | Solo Developer June 2026

- Built and deployed a full-stack web app that helps Dallas residents find community resources like food banks, shelters, and job centers, using React, TypeScript, and Tailwind CSS.
- Created a serverless API with Vercel to deliver fast search results and a clean, responsive user experience.

SKILLS

Languages: HTML5, CSS3, JavaScript (ES6+), TypeScript, SQL, PostgreSQL

Frameworks & UI: React.js, Express.js, Tailwind CSS, Vite
